North Pacific Research Board Seeks Nominations for Science Panel

The North Pacific Research Board (NPRB) seeks applications to fill three seats on its Science Panel. The deadline for receipt of application materials is Friday, March 1, 2024.

The mission of the North Pacific Research Board is to develop a comprehensive science program that will further understanding of the North Pacific, Bering Sea, and Arctic Ocean ecosystems, inform effective management of fisheries, and help to sustain and enhance marine resources. The Science Panel advises the Board in shaping its scientific program, including science planning, identification of research priorities, evaluation of scientific information relevant to the Board’s mission, and review of proposals received by the Board. For more information, please refer to: [http://www.nprb.org/nprb/about-us/science-panel](http://www.nprb.org/nprb/about-us/science-panel).

Desired qualifications for the open seats on the Science Panel include expertise in one or more of the following categories:

1. marine fish and/or marine invertebrate ecology;
2. stock assessment and fisheries management;
3. quantitative ecology;
4. marine mammal ecology
5. veterinary science and marine wildlife health

Strong candidates will demonstrate active engagement in science and research, applied expertise, knowledge of pressing fisheries management issues, research needs, and priorities of state and/or federal managers. Individuals with broad expertise who are comfortable reviewing a wide range of proposals are desired as is direct experience with a co-production of knowledge approach to research. Members are selected for their expertise, broad perspective, experience, and leadership in areas important to NPRB’s research program. Panel members are asked to set aside time twice a year for meetings (late March and late August) and to devote significant time to reviewing proposed research in the two weeks in advance of those meetings.

The Science Panel meets twice each year for 3 days (March and August), in Anchorage or Seattle. Panel members serve four-year terms, with a maximum of two consecutive terms. While no pay is provided for serving on the Science Panel, the Board covers expenses for travel, food, and lodging for non-federal panel members to attend panel meetings, and to attend the Alaska Marine Science Symposium, held in January each year in Anchorage.
The deadline for receipt of nomination materials is Friday, March 1, 2024. Nominations and self-nominations may be submitted by email to Matthew.Baker@nprb.org.

Nominations/Self-nominations must include:
- A brief resume of not more than two pages;
- Full contact information including phone number and email address; and
- Up to three letters of reference.

Nominees will be considered and appointed by the Board at its April 2024 meeting. The new Science Panel members will begin their four-year term in May 2024. The Science Panel is scheduled to meet August 20-22, 2024 in Anchorage.

The Board will consider the following attributes in making appointments to the Science Panel:
- Candidates should be committed to full and active participation in all meetings in their term.
- Candidates should be prepared to complete and submit proposal reviews during the month preceding the Science Panel meetings.
- NPRB has a robust conflict of interest policy and candidates may be recused from reviewing proposals in their primary areas of expertise. Candidates should be willing and able to provide rigorous review of proposals in all the NPRB funding areas.
- Candidates should have a demonstrated ability to be objective in considering research activities and science planning.

Please note:
- In-person attendance and active participation at panel meetings is critical to NPRB’s success. Nominees and self-nominees are asked to take a close look at their calendars to see if the typical Science Panel meeting schedule is compatible with theirs. The Science Panel typically meets the last week of March and the third or fourth week of August every year.
- Conflict of Interest Policy. The Board and its panels follow conflict of interest procedures (available here) during the proposal selection process, requiring recusals and disclosures on individual proposals. Nominees and self-nominees are strongly encouraged to review this policy.

For more information contact NPRB Science Director, Matthew.Baker@nprb.org or NPRB Executive Director, Lynn.Palensky@nprb.org. Please also visit the website at www.nprb.org for more information about the Board and its activities.
